

SHEF Manual Chapters, Tables, & Appendices

Note: Page numbers refer to the page number when opening the PDF file in a browser. The full document is 150 pages in a browser at 100% display Zoom.

CHAPTERS

	Page
1. Introduction to SHEF	8
2. The Basic SHEF Formats (.A, .B, .E)	10
3. Elements of Data Identification	14
3.3 Description of PEDTSEP	
Physical Element, Duration, Type, Source, Extremum, Probability	
4. Syntax of SHEF Messages	17
5. Rules for Coding SHEF Messages	24
7 examples of decoded .A messages	
8 examples of decoded .B messages	
4 examples of decoded .E messages	
6. The SHEF Parse Software	38
7. User's Guide (includes examples)	40-61
Before examples for each format, there is discussion of items like...	
codes for missing data, "Trace" precip, Stranger Station Reports,	
line length, internal comments, use of "spaces", splitting into 2 or more lines,	
Revision code (.AR, etc.), "packed" vs "unpacked" .B reports	
3 more coded .A examples	
5 more coded .B examples	
3 more coded .E examples	
Examples of "continuation lines", reservoir data messages, power generation at	
reservoir, "paired value" (a.k.a. "vector" physical elements, unevenly-spaced time	
series, snow data, roundup table showing colon use, dump of 6-hour automated	
precip gages, report with non-standard duration (72 hours), agricultural weather	
report	

(continued...)

TABLES

	Page
1. Physical Element Codes	72
2. Send Codes	80
3. Duration Codes	81
4. Type and Sources Codes	82
5. Extremum Codes	85
6. Probability Codes	86
7. Standard Defaults (and Exceptions)	87
8. Time Zone Designators	88
9a. Date/Data Type Elements	89
9b. Date/Data Time Unit Definitions	89
10. Data Qualifier Codes	90
11a. Duration Code Variable Specifier	91
11b. Duration Code Variable Specifier Units	91
12a. Time Interval Specifier for .E Format	92
12b. Time Interval Specifier Units	92
13a. Date Relative Code	93
13b. Date Relative Time Units Definitions	93
14. Ice Codes for Ice Report	94
15. Snow Codes for Snow Report	95
16. Ground Frost Report	96
17. Precipitation Type Codes	97
18. State of Ground Code	98
19. River Trend Indicator Code	99
20. Surface Frost Intensity Codes	100
21. Surface Dew Intensity Codes	101
22. Probability of Measurable Precipitation Codes	102

APPENDICES

	Page
A. Unit Abbreviation Definitions for Physical Elements	106
B. Units Conversion for Physical Elements	107
C. NWS Synoptic Codes for Present Weather	108
D. NWS Synoptic Codes for Past Weather	113
E. Ice and Frost Terminology/Structure of Frozen Ground	114
F. Daylight/Standard Time Change Dates	116
G. Physical Element Definitions	117-131
H. SHEFOUT File	132
I. SHEFPARM File	134
J. SHEFPRINT ERROR MESSAGES	149
