

10 Steps to Issue a Warning or Statement

1

- Select the warning **product type**

2

- Check the **duration**

3

- Place the “drag me to a storm” **point or line** on the storm

4

- Track and check **storm motion**

5

- Create and/or trim the warning **polygon**

6

- Select the **source** and **tag**

7

- Select the **hazards/intensity** and **calls-to-action**

8

- Create and **quality-control** the text, then **send**

9

- Hit “**restart**” to clear the hatched outline area

10

- Write down the warning info on your **Warning Tracking Sheet**
