

RCAkit User Instructions

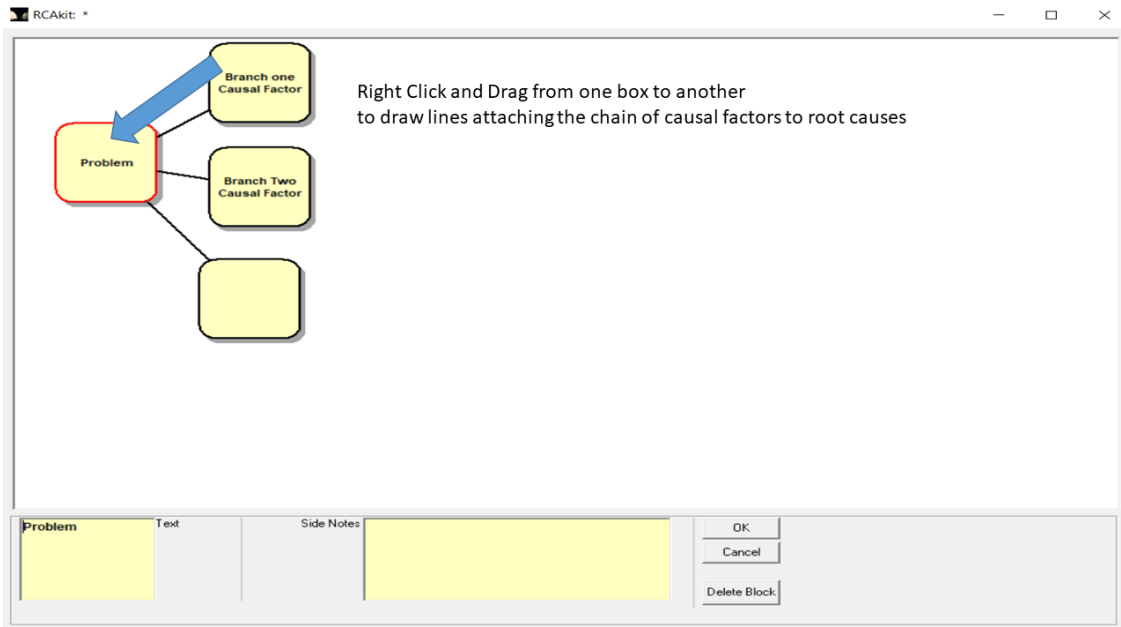

1. After you open RCAkit, follow along with the screenshots shown below to help you create your RCA

2. Repeat the process shown above as many times as it takes to add in all your causal factors and root causes

3. To draw lines from one box to the other that link your problem statement with causal factors (and eventually root causes), right-click and drag from one box to the other

4. When you're done, you can save the XML file and/or send us a screenshot of the finished analysis
